

Seanie Gleason

Senior Software Engineer

(636) 577-1601 | seanie@gleason.tech | St. Louis, MO | linkedin.com/in/seanie-gleason

PROFESSIONAL OVERVIEW

Innovative Senior Software Engineer specializing in the Java/Spring ecosystem and cloud-native platform engineering. Expert in crafting resilient microservice architectures, building sophisticated CI/CD pipelines with Kubernetes and Docker, and developing custom Gradle plugins for automated quality enforcement. Currently building an LLM-driven application generator to create new REST API application given a UML diagram.

WORK EXPERIENCE

Senior Software Engineer | National Information Solutions Cooperative, Lake St. Louis MAR 2021 – PRESENT

- Created a custom gradle plugin to standardize quality gates across the CI/CD pipeline, automating contract, mutation, and integration testing to ensure 100% architectural compliance.
- Built a Java application framework using Spring Boot's inversion of control (IoC) and dependency injection patterns, standardizing services across the organization.
- Developed a scalable CI/CD pipeline specifically for complex integration testing, utilizing Docker and Kubernetes to spin up ephemeral environments for every PR.

Lead Technical Consultant | Perficient Inc., St. Louis APR 2019 – MAR 2021

- Managed multiple teams for a major Pharmaceutical Distributor developing Spring Boot Microservice APIs on Pivotal Cloud Foundry using Kafka Stream Messaging for intercommunication between services.
- Managed large-scale legacy-to-cloud migrations and version upgrades, ensuring modern security, performance, and scalability standards were consistently met.

Lead Software Engineer | Graybar Electric, St. Louis JUN 2018 – APR 2019

- Developed a multi-cloud data synchronization strategy using Spring Cloud DataFlow and GCP Pub/Sub, bridging on-premise and cloud ecosystems for reliable data mobility

Web Developer | Graybar Electric, St. Louis JUN 2015 – JUN 2018

- Modernized Graybar's E-Commerce landscape by transitioning monolithic systems into scalable Spring Boot microservices on Pivotal Cloud Foundry.

Web Developer | Randstad, St. Louis JUN 2014 – JUN 2015

- Built the E-Commerce checkout flow and Punchout integration framework.

Entry Level Software Engineer | Accenture, St. Louis JUN 2013 – JUN 2014

- Implemented PISql scripts to manage Postal Mail Mass Marketing Frameworks.

EDUCATION

Bachelor of Science in Computer Science | Lindenwood University – St. Charles, MO Graduated: 2013

SKILLS

Java Frameworks
Kubernetes
Docker

CI/CD Pipelines
Amazon Web Services (AWS)
Terraform

Pub Sub Messaging (Kafka)
MongoDB (NoSql)
Cloud Foundry
