| • Java | • Amazon Web Services (AWS) | • Mongo NoSql Database |
| • CI/CD Pipelines | • Terraform | • Cassandra Database |
| • Spring Framework | • Docker | • Kafka Messaging |
| • Kubernetes | • Google Cloud Platform (GCP) | • GCP Pub/Sub Messaging |

PROFESSIONAL EXPERIENCE

NISC - Lake Saint Louis, MO

March 2021– Present

Senior Software Engineer

- Architected and implemented a core Java application framework mirroring Spring Boot's inversion of control (IoC) and dependency injection patterns, standardizing microservices across a 300+ person engineering team.
- Developed a scalable CI/CD pipeline specifically for complex integration testing, utilizing Docker and Kubernetes to spin up ephemeral environments for every PR.
- Engineered a custom gradle plugin to standardize quality gates across the CI/CD pipeline, automating contract, mutation, and integration testing to ensure 100% architectural compliance.

Perficient Inc. - Saint Louis, MO

April 2019 – March 2021

Lead Technical Consultant

- Managed multiple teams for a major Pharmaceutical Distributor developing Spring Boot Microservice APIs on Pivotal Cloud Foundry using Kafka Stream Messaging for intercommunication between services.
- Created company specific Spring Boot Starters that reduced two stories per agile cycle.
- Upgraded several Spring Boot applications to the latest version to allow for newer features.
- Architected several Kafka Messaging designs that aided in rapid development.

Graybar Electric - Maryland Heights, MO

June 2015 - April 2019

Lead Software Engineer (2018 – 2019)

- Lead a team building Spring Cloud Dataflow pipelines using GCP PubSub to transfer data between an On-Premise and Off-premise Cloud Foundry installation.
- Constructed a multi-cloud agnostic Jenkins pipeline using Spring Cloud Pipelines that allowed for deployment to two separate Cloud Foundry Foundations.

Web Developer (2015 – 2018)

- Developed Spring Boot microservice APIs on Pivotal Cloud Foundry to deconstruct the monolithic E-Commerce website
- Designed and implemented the Punchout integration framework into the IBM E-Commerce website that produces a large majority of online order revenue
- Built the E-Commerce checkout flow and developed SEO frameworks during the B2C/B2B website re-launch.

EDUCATION

Bachelor of Science - Computer Science
Lindenwood University - St. Charles, MO

May 2013
